

The
triangles

Advent

by Karatuan

Prologue

Arizona desert, USA

My car was kept running for hours one road in the scorching desert.

It was a desolate desert as far as the eye can see.

I felt not seem to me there is only one person in this world.

When I was over the hill, I saw a huge parabolic antenna. It was shining.

I was surprised by a sudden appearance of huge building with civilization.

I noticed that are surrounded by countless parabolic antenna toward the direction of various.

Low buildings stood side by side in the desert. They were surrounded by a chain-link fence.

There was a helipad was almost buried in the sand in the center of the buildings.

Road was long and thin branches toward the gate of the fence.

There was a base Orwell.

Orwell base was monitoring receives information sent from every satellite launched by the United States military and other satellite.

There was collected in real-time was 24 hours know various information collected by the satellite.

Were the eyes and ears of the United States to allow quick response, including military action.

It was eight o'clock that morning.

Captain Christopher Smith and Corporal Kirk Anderson were on duty on the monitoring mission.

They were monitoring the vast amount of information sent from the satellite.

Near the end of night shift work, it was the time the next person is coming soon.

"Tonight's work seems end safely without incident," Smith said.

Corporal Kirk handed to Smith poured in a cup of freshly brewed coffee. And he responded.

"Well. But I'm feeling a little bored without anything recently"

"Not something you say such a thing. Did you forget missile tests conducted by some country? We were forced to work in the headquarters for three days of data analysis. It was hard. I also do not want to do the same thing. Peace is best"

At that time, the alarm rang.

"Hey, look alarm rang. Because you have said that extra" Smith said.

Kirk asked, "Is my fault?"

"Yes. Reported to me early to analyze the situation," Smith said with a laugh.

Kirk answered "Yes Sir," with a laugh. He started the analysis of the alarm in the monitoring terminal.

They were monitoring the satellite information from a wide variety.

Magnetic monitoring satellite has been monitoring for magnetic variation on earth.

Infrared surveillance satellites to monitor the thermal anomalies, such as volcanic eruptions and massive explosion.

Optical surveillance satellite is monitored by video signs, such as military or missile launch.

X-ray space surveillance satellite to monitor the space by the line X.

All kinds of information from satellites, was gathered in this Orwell base.

Information on the other side of the world had been transferred in real time to this base from an antenna that is located on U.S. allies around the world.

Magnetic alarm monitoring from satellites of which were ringing.

While Kirk has been slow to log analysis of magnetic abnormalities, abnormal alarm also joined from infrared surveillance satellites.

"What's going on," Smith heard loudly in alarm sound.

"Magnetic anomaly is happening for a few minutes somewhere within 100km radius from Tokyo, Japan, I can check the log."

"There is a log that magnetic anomaly is occurring somewhere for a few minutes within 100km radius from Tokyo, Japan."

"What about infrared surveillance."

Kirk has been moved to the infrared monitoring terminal while saying. "Please wait a little."

"Enormous release of energy can be confirmed after a few minutes from the start of the magnetic anomaly, it is a moment in the same area. Energy release is occurring at the same time and the time of magnetic anomaly has disappeared."

"What is the situation now?"

"Now all the abnormal have been restored."

Kirk stopped the alarm by entering the release command from the terminal. Silence came again to the cockpit.

"Do not any information on optical surveillance satellite?"

"No. It is 22 o'clock local time. No optical surveillance satellite that monitors the region at this time."

"Yeah, I'll keep the situation reported to headquarters."

"It was a huge amount of energy radiation and magnetic anomalies that occurred during the same time in the same area."

"Yes. However, there is no doubt that serious was it that something happened. After the analysis is the work of the government. Let them begin the analysis reported earlier by our data. Kirk! Give it to me to collect all the information before and after the occurrence of an alarm."

"Yes, sir"

Smith took a direct phone to the headquarters.

Flight JAL192, Japan

JAL192 had been scheduled to arrive at Haneda flight a little later than 22:15 on time taking off Osaka Itami Airport.

The plane flew on autopilot with the computer over the Pacific Ocean coast of Osaka.

Around the outside tip of the Boso Peninsula, it was toward the Haneda Airport by turning to the left.

"Auto mode off"

At the direction of the captain, copilot lifted the autopilot.

"Turning left"

Captain tilted to the left control stick.

Aircraft was turning to graze the tip of the Boso Peninsula, while leaning to the left.

It went into the course diagonally across the peninsula towards the Haneda Airport.

Altitude of the plane fell gradually.

"Altitude, 1000m" copilot was reading the altimeter.

Aircraft had been falling more slowly.

"All good"

Copilot reported to the captain to check the gauges.

When the aircraft has entered the straight course toward Haneda Airport, there was a communication from Haneda Airport control tower.

"This is Haneda control tower. JAL192. I confirmed the landing approach to the course. Keep the course as it is."

There was an instruction from the control tower.

"This is JAL192. Understood," replied the captain.

"Altitude, 800m" copilot was reading the altimeter again.

When the copilot was looking at the ground in front of the right through the window, the night view of the city did not look like something was cut off.

(It's something strange)

Copilot thought so.

When the copilot was look back on board, every alarm in the cockpit began to sound all together.

"Stop falling"

The captain stopped the descent by pulling up on the control stick in a hurry.

Alarm did not stop ringing. New alarm rang more and more.

The captain called the control tower.

"This is JAL192. Tower please."

"This is Control tower. Please JAL192"

"This is JAL192. Abnormal situation occurs. The alarm sounded all together of the plane. For more information about the abnormality is unknown. Now, we have to stop the downturn."

Control tower is here.

"This is control tower. I understand. Retreated from the landing course turning to the left, keep to 1000m altitude."

"This is JAL192. I rose to 1000m advanced turn left."

The captain told the copilot to suspend communication with the control tower.

"Report the situation to me."

"Engine is all abnormal. Hydraulic Parts is abnormal. Cabin air pressure is abnormal. Control of the airplane by the computer is disabled. Monitoring device is displaying all the features of the airplane is abnormal."

Copilot reported.

"What's going on," said the captain with the index finger while hitting the altimeter.

Altimeter was repeated up and down. Horizontal display unit and compass was whirling.

"Tower please. This is JAL192. Automatic control of the flight is impossible. Meters and gauges are useless. It is impossible to ascertain the current status of this plane. Please make a flight instruction."

"This is the control tower. I understand. Is it possible maneuvering the airplane by manual?"

"This is JAL192. Manual steering and the engine can be controlled manually."

"This is the control tower. I understand. JAL192 while turning left at 820m altitude According to the radar now. Please to recover, as it is in the course of a 1000m altitude."

"This is JAL192. I understand. I raise the plane. Please let me know if altitude reached 1000m."

The captain pulled the stick carefully. Aircraft seemed to have risen slowly.

"This is the control tower. JAL192. Altitude is 850m. Not rise from 850m altitude of the airplane."

"This is JAL192. It is a ridiculous situation. I checked."

Captain was said to copilot.

"Check the engine. It is impossible by the equipment check. Please do visually."

"Yes, sir"

Copilot has stood up to release the seat belt. He was confirmed by the two aircraft engine with the right wing and left wing.

"Captain! We have a big trouble. No. 1 engine has been stopped. No. 3 engine output is reduced."

"What did you say? Open throttle."

The captain told the copilot while opening the throttle further.

"Please let you recover somehow the engine number 1."

"Yes, sir"

Copilot was several attempts to restart the engine by operating the No. 1 starter.

However, engine No. 1 was not recovered.

"Captain, I could not be restarted."

"It could not be helped. Let rise in the remaining two aircraft engines."

The captain called the control tower.

"This is JAL192. No. 1 engine has been stopped. No. 3 engine output is reduced. The plane will rise in the remaining two normal engines."

The captain was in full throttle.

“This is the control tower. I understand. JAL192. You are beginning to rise gradually. Advanced, it is 850m, 900m, 950m, and 1000m. You've reached the 1000m altitude. Please keep the status quo.”

“This is JAL192. I understand. I keep the status quo. But, I do not know so bad altimeter altitude. Please contact me if I deviate from the 1000m altitude.”

“This is the control tower. I understand. Constantly monitor, we will contact you in the up and down fluctuation of 50m.”

“This is JAL192. Thank you.”

“This is the control tower. We hope it is found contact details to other situations.”

“This is JAL192. I understand. I end the communication. Over.”

The captain was alternative to copilot control of the aircraft. He called the Chief Purser in income.

“Please report to check the status of the rooms.”

There was a reply directly from the Chief Purser.

“There is no abnormality in the room. I had some questions from customers. They asked to me, why the delay is landing the plane? I explained, it is because a crowded airport.”

“It's okay. Please contact there was anything else.”

The captain looked out the window to turn off the income.

Black cloud was expanding at the bottom of the window. It was a cloud copilot saw earlier.

Landscape view of the captain could not see a whole is blocked.

The black cloud had grown to many times in a short time.

Captain saw one tiny particles of light, to come at a tremendous speed going up from the ground in front of some Km.

(Is it out-of-season fireworks?)

Captain thought so. He was after the small particles of light by the eye. Black clouds around the tiny particles of light began to react.

Towards small particles of light came up, streaks of blue light like lightning from the clouds began to grow what this also.

Streaks of light were being absorbed by the particles of light.

Tiny particles of light were absorbed, while light streaks rise further. Particles of light became a ball of light expands rapidly.

When the ball of light rises to several hundred meters from the ground, the ball of light was exploding.

The explosion was happening in front of about 5000m JAL192. Flash from the explosion had spread to just below the altitude of JAL192.

Scale of the explosion was about several hundred meters in diameter. It was about double the usual fireworks. However, the light intensity was significantly higher than compared to the other fireworks.

The captain looked away from the explosion was so dazzling.

Blast was attacked late on a loud explosion. Aircraft was vibrating violently swaying from side to side while greatly.

Captain thought.

(Directly above the explosion that had no doubt there was some kind of impact on this machine.)

The captain looked at the ground and will check what has happened. But the captain did not see anything blinded by the effects of the previous flash.

When the afterimage of brilliantly white light has disappeared from the eyes of the captain, the black cloud had disappeared.

"The alarm was all gone," copilot reported.

In the voice of the copilot, the captain noticed.

When the shaking had subsided by the explosion, all of the alarms JAL192 had been restored. The state of the airplane was returned to its normal state.

"Check the details, please report it to me. Then, I want you to do a restart of the No. 1 engine."

The captain instructed the copilot and then called the control tower.

"This is JAL192. Control tower please.

"This is the control tower."

"All alarm of airplane has been recovered. Meters and gauges seem to have returned to normal."

"Good to hear. Control tower, I was OK."

"There is no abnormality in the airplane. No. 3 engine was recovered. I tried to restart the engine number 1."

Copilot had to restart the engine number 1.

"Captain, I have to restart the engine number 1. The output of the engine number 3 is increased. All functions returned to normal," copilot reported.

"Tower. All anomalies have been restored, including the No. 1 engine No. 3 engine. Please give landing clearance."

"This is the control tower. I understand. Return to normal approach course at 1000m altitude, waiting for instructions."

"This is JAL192. I understand," replied the captain

The captain was allowed to turn left the aircraft by tilting the control stick to the left. And he heard the copilot.

"What happened?"

"I have no idea. By the way, did you notice those dark clouds?"

Copilot saw the direction of the clouds above.

However, dark clouds had disappeared just spread views of the night as usual.

"Yes. I saw. Along with the explosion of a little while ago, but has disappeared."

"Is it a cause of the anomaly is that black cloud?"

"I do not know. Well. Cause will wait for the outcome of an investigation. Come on. We are trying to

land, now.”

JAL192 landed safely at Haneda Airport.

The results of the subsequent investigation became a trouble of engine No. 1 and No. 3 engine, unexplained abnormality monitoring device.

There was no explosion and that the presence of the black clouds is described in this report.

Beginning

These symptoms have been generated from a single cause.

It was a moment that brought a new energy on the human race.

The energy was like thunder force.

Energy was out of the hand that fierce God has descended.

Its power has destroyed everything.

Research

“Earth top”

It's a magical tops are made of metal.

The tops drew from space attractive force and magnetic force.

This tops give a whole new energy to the human race.

Researchers, Kitano in Japan

Kitano lived to buy old houses near the station Kazusa Kameyama.

The station was the terminus of the railway Quruli.

Located in the southern Boso Peninsula, Chiba Prefecture

The house was located about 10 minutes by car from the station running, went up the mountain along the creek.

Field had spread to surround the main house and barn.

Kitano was doing research in the room of the home while working as an adjunct professor of physics at the high school.

Kitano went into the laboratory at 8 pm on the third day New Year.

One large cardboard box was put on laboratory Kitano.

In a cardboard box that had a lot of small white box. Small white box are made of translucent plastic.

White small box 6cm square, had been labeled red.

It was printed as “Earth top” on the label.

In a small box, there was a top one by one.

Top is made of thick metal panel of about 6cm in diameter.

It was fitted into a frame made of two ring metal system.

The frame rings, one ring has been fitted inside the ring at right angles to one another.

One ring surrounding the top.

Where the two rings are crossed has been fixed in two places.

The top are connected to the bearing ring and can be rotated in the ring.

Axis is up and down on the outside of the ring. The center axis of the top had been combined with the center axis of the outer ring.

Turn vigorously in the top, and put straight on the table axis of the ring, the ring was rotated slowly in the opposite direction to the direction of rotation of the top.

Tilting the axis, top exercise was to draw a circle at the top of the shaft.

Place the tip of the thin rod at an angle to the axis, the top has been rotated.

Top kept spinning without falling.

Despite defy gravity outside the center of gravity from the bar.

Rotational energy is held against the top attraction of the earth should fall otherwise.

Kitano was doing a research to draw another energy using the rotational energy of the top mechanism is against the gravity.

Former teacher

Kitano had remembered.

Interaction with the teacher college professor Akiba is the end of last year at the tavern.

"What are you trying?" Akiba asked Kitano.

"I'm thinking a combination of top earth, trying to create a new energy." Kitano said.

"It's impossible. For strange movement by the rotation of the top balance has been demonstrated theoretically. It is a foundation in the basics of physics. As such you have been teaching high school students."

"Yes. I have been teaching using angular velocity, Sin, Cos, or Tan.

But there is a top that actually is moving against gravity. I think the power of something different, a different energy, and some."

"So, what are you going to prove any theory about its energy?"

"I was not possible prove a theory. But I'm really seemed to exist."

"If you say so, I think you only have to check for the presence of new energy actually."

"Yes. I also think so. I'm repeating the experiment, I recently had some response."

"Do you say that there is a response?"

"Yes."

"What kind of response?"

"I made a device that I have a combination of some of the top. I had to rotate the tops. When I had finished, turn the top of all, the entire device to be pulled into something suddenly fell on the floor slip on the table, the unit fell apart."

"What. Is it true?"

"Yes."

"It would be great if it was true."

"Yes. I think so, too."

"When it's on?"

"It's October."

"Then, did you reproduce the event?"

"No"

"Did you leave the record?"

"No. I was doing with a light heart I did not have much confidence. I have not taken the recording."

"That's a pity"

"Yes. But I know the configuration of the device."

"What was it any configuration?"

"It is a triangle. It is a combination of the triangle."

"Is it a triangle?"

"Yes. The experiment began with the least number of side triangles. I stretched up and down outside the axis of the top ring. I make an equilateral triangle in the top. This is the basic triangle."

"I see"

"A combination of three basic equilateral triangles, I made a triangular pyramid. In addition, a combination of several triangular pyramids, I have experimented."

"Did any combination in the form of a triangular pyramid How many?"

"There are four. I combined four triangular pyramid. I've put on the table underlying triangular pyramid. I put on three sides of the triangular pyramid, to match the other three vertices of a triangle pyramid. Where the top is a double edges overlap, was one."

"If you know so much, would be easy to reproduce."

"No. I don't know the direction and speed of rotation of the top of each. I can't able to reproduce at that time would not be the same as them."

"Well, you do not know where the key is the most"

"Yes. I will experiment to record in the future."

"You're right. I'm looking forward to."

At that time the conversation was over.

Experiment

Kitano continued to reproduce the new energy, it's he told Akiba.

Experimental device made of four triangular pyramids had been completed.

It has a total of 15 Earth tops each one has been incorporated as a rotor on each side.

Kitano has created to note the combination table for each forward and reverse rotation of the rotor.

The experimental work was to verify each one will combinations.

It is a combination of the forward and reverse direction of rotor 15.

It is the 15th power of 2. There were about 32 000 species combination.

It was a very tough process.

The experiment was a series of confirmation that does not happen anything.

Kitano experiment was repeated for about two hours. When Kitano repeat the experiment for about two hours and tried to end the experiment that day. An error has occurred

Kitano has changed the setting in the direction of rotation of the rotor of a few. He turned the rotor 14 in order to put the switch.

At that time, the entire device is vibrated slightly.

Kitano has confirmed the direction of rotation of the rotor 14 that are running. And he confirmed that the combination table.

(All right, No doubt in this combination. Something will happen)

Kitano thought so. He was turned on last switch.

Reproduction

No moon in the sky, the air is cold, the stars were twinkling scale.

Is it a plane that took off from Narita Airport?

Or an airplane trying to land at Haneda Airport is not clear.

Several aircraft was flying. Their plane had small blinking lights

Over the Boso Peninsula, the plane was full.

In the night sky, black small dot was born.

It was a place of 100m above the number of laboratory Kitano.

Eventually, black dot becomes black mass, it began swirling counterclockwise.

Shining star in the night sky is no longer visible in sequence as was swallowed in the black vortex.

Black vortex had been expanded at a furious speed.

Kitano turned on all the switches, the final Earth top began to rotate.

At that moment, a subtle vibration of the device is stopped.

All rotors, the rotation continued quietly.

After a while, one rotor rotation gradually went up compared to the other rotor.

(It was weird.) Kitano thought so.

(It was not a structure like this to accelerate.)

Eventually, Began to up, in the way the rotation of the rotor in the same. The device also has vibration.

The vibration became gradually stronger.

Kitano is off to all switches in a hurry.

However, the rotation of the rotor did not stop anymore.

Vibration has become more and more intense.

Kitano was surprised.

Device was floating faintly on the table.

Furthermore, the device has been shining a little whole.

Light becomes more and more strong, had become a blink of white flash.

The vibration had reached its peak.

Each rotation of the rotor in the limit has been reached. The device was likely to collapse.

At that time, the device flew in force as if the rocket was fired.

The device flew pulled up while crunching and peeling the roof of the house.

The device has become a ball of light rise.

Eventually, lightning bolt also grew towards what this device from the black cloud.

Lightning, were being absorbed into the ball of light.

Blue Lightning had increased rapidly.

Ball of light began to rise gradually while expanding further.

After a few seconds, at the same time as the terrible sound like thunder, ball of light was exploding.

Whole place was filled with such a dazzling white flash.

Light disappears, also disappeared explosion reverberate for.

Darkness and silence reigned around as if nothing had happened.

Kitano had become trapped under fallen debris, such as walls and pillars and roofs.

He had lost consciousness.

Kitano had been buried in the debris of the roof was blown away.

Kitano's house damage was greater.

The roof was lifted pulled off more than half of the whole house.

It had been broken into a few scattered in the air.

Most of the roof fell down on the house also.

But, part of it was torn off by to distant high rise is flowed into the wind.

The pillar was missing some.

Things were scattered all over the house. Electricity was off darkness as far as the eye can see.

Orwell base U.S.

Captain Smith was submitted to the headquarters of all the data about the anomaly in the morning.

He had to come home and go to bed in the afternoon.

Sound shrill telephone bell struck Smith.

"I'm sorry to wake you. Even though you are sleeping on night duty work is finished. "

It was Major Douglas of his superiors.

"No Sir."

"Headquarters were analyzed briefly in abnormal data you gave me this morning to submit. As a result, the radiation energy of awesome scale was confirmed. It was the early beginning of the year, was asked to analyze the information control department of the Pentagon. The result is the fact that the Pentagon found outrageous."

"Is it outrageous fact?"

"Yes. You have collected data showed the possibility of tactical nuclear explosion. Alternatively, it is likely that indicate the possibility of more energy has been released."

"There is no such supposed."

"No. Pentagon experts were surprised glance at the data. Pentagon experts want to have detailed data on the day as well as data. They look at the data coming directly. I want to come to my room tomorrow morning you guys. You are witness to the survey."

"I understand. I'll tell Kirk."

"Well, thank you"

Major Douglas hung up the phone. Smith immediately contacted the Kirk.

Pentagon U.S.

Information control department of the Pentagon that was sent from the data base of Orwell, analysis officer give up a holiday had gathered.

Brigadier General Carter also Chief Supervisor, was waiting in his office.

"Really, do you say abnormal radiation levels of tactical nuclear energy had happened in Japan?"

Brigadier General Carter asked the officer analysis.

"Yes. There is no doubt. Southeast direction of the Japanese capital Tokyo, have occurred within a few tens of kilometers."

"When it happened?"

"It happened around 8:00 am is January 3. It is at around 10 pm local time on January 3."

"Why such an explosion happened? There is the immediate vicinity of Tokyo."

"I do not know. This explosion is different from an ordinary explosion, is that a wide range of magnetic anomaly has occurred from a few minutes ago in the same area. The energy level which is emitted at that time is much higher than normal explosives. Magnetic anomaly has disappeared at the same time as the radiation energy. I think that there is some relevance to these two events.

Besides, magnetic anomaly occurs after the explosion nuclear explosion if normal. This time I think the point is also unique in this regard."

"Do detect gamma rays and radioactivity?"

"No. Radioactivity is not detected. So, I say radiation levels of energy and an entirely new type of tactical nuclear weapons occurred. It is impossible that in addition to the nuclear explosion of such a material level of existence."

"Suppose that it is true. It will be an entirely new source of energy has emerged. There is a possibility to change the history of mankind in the future."

Brigadier General Carter said continued.

"I will contact the person in charge of General Crowley Far East regional strategy. After that, I will contact Mrs. Rice Secretary of Defense during the holidays."

Brigadier General Carter was contacted by telephone dedicated line to General Crowley.

Brigadier General Carter was contacted by telephone to General Crowley dedicated line.

Then, he contacted the Secretary of Defense.

He was told that the event could become a new threat occurs in the Far East.

Secretary of Defense

Defense Secretary Rice was in hotel holiday destination.

She received a call from Brigadier General Carter.

She was worried about whether or not to contact the president.

For cases that do not just take the confirmation there is data, Rice had been reluctant to bother the

president on vacation.

At that time, came from General Crowley contacted her.

"Are you Secretary of Defense? I'm Crowley. Did you hear about the unusual situation in Japan?"

"Yes. I received a phone call from Brigadier General Carter now. "

"There is no problem if it's the case that happened by chance. It is the stage of data yet. If it is a new generation of energy. I think that might affect the future and strategies versus the Far East. It will be able to negate the need for existing energy sources such as fossil fuels. New energy broke the power of the world map that was dependent on oil and other."

Crowley emphasized the significance of this event to Rice.

"I know. Are there any government or media, such as the movement of this energy to radiation in Japan something anyway?"

"I was confirmed in the U.S. Embassy in Japan. There were several persons on duty only because it is in vacation. They said that no special action information in Japan."

"I see. We just have fears, Japan is a peaceful country indeed."

"I think. Energy of this radiation not detect in their monitoring network perhaps."

"By the way, I'm worried about whether or not to include the contact to the president now. I hesitate to think of the case, then the results of the investigation if nothing had happened."

"Yes. I would guess your feelings. I have a multi-faceted data represent only is that something happens to be a fact. You tell that it is under investigation in presidential aide. How about ask him to convey to the President from the presidential aide?"

"That's right. I understand. I contacted presidential adviser believes to be if this is serious. How do you think the generals I think there needs to be some action as the military."

"Yes. I think it is necessary to confirm the information collection and on-site."

"Do you think just enough in dealing with the military?"

"I think there is no problem, especially in Japan because it is closest allies. However, I think the U.S. military in Japan can't go to the field survey. I think the CIA has melted into Japan, it is a good idea to ask the cooperation."

"I understand. I will contact the Secretary at CIA. And I will contact to another person."

"Who do you contact?"

"Well you know. I contacted Vueta company chairman, Mr. Rokkufera. How Vueta munitions industry business entity, whether to deal with cases like this? I would like to ask for instructions. Please be in your understandings of just this with me as always."

"I understand"

Crowley said so hung up the phone.

Syndicate

Rice phoned Vueta company chairman, Mr. Rokkufera. Vueta company is a business entity defense

industry dealing with anything related to conventional arms weapons, biotechnology, chemical, and nuclear.

Rice became Secretary of Defense is the current position of the effect was larger syndicate. Rice could not defy him.

"It's me." Rokkufera responded to a call from Rice.

"This is rice. I called to report the unusual situation that occurred in the Far East"

"I have heard such a thing a long time ago"

"What?" Rice was surprised.

"You do not help at critical times late to do anything to always. Such information is the initial important. The gravity of the situation that I found first heard this information. When a terrorist and country hostile to our country, if this information was put in hand. Do you think what will become the world's military balance? The initial slow as you may occur that serious."

Rice had thought of the old man has begun also nonsense. But, Rice was listening in silence though.

Opponent continued.

"Military industrial enterprises have a competition to develop a new technology in our country. I've passed on to other companies in excess of nuclear destructive power. Superiority of our syndicate has in our country and the world market is impaired. We not only collect the information, the information is not passed on to other companies is a mission. We also need to take away by force, the people involved as well as information."

(I know such a thing.) Rice is thinking.

But Rice said.

"I understand"

Opponent continued further.

"And, I ordered on the matter"

"How did you order?"

"What? Do you not even know such a thing?"

"Sorry," Rice apologized without knowing the reason.

"I gave instructions to Brigadier General Carter in your name. I chose the two young talented engineers from the Institute's comprehensive Vueta. To go within 24 hours to the base event was observed them. Physics, chemistry, engineering, and astronomy, one of the technicians are familiar with a variety of other disciplines. The other engineers are experts in systems engineering genius. The other engineers are experts in systems engineering genius. Vueta's name is hidden, I want to be with your subordinates technical officials of both of them. And, you are the hope of so they correspond to anything."

"I understand"

"I will contact the other members of the syndicate. I want you to report to me every time the

information gathered in your place now.”

He'll hang up the phone. Rice said hurriedly.

“To the people of the other members of the syndicate, will not be available direct from me to explain about this issue?”

“Why do you need that?”

He asked suspiciously.

Rice said.

“This information is significance it has. Event this has the potential to revolutionize the market for fossil fuels in the future as new energy”

“There is indeed such a thing. However, it is not conclusive evidence that was obtained in the current situation is still in the information.”

“There is no doubt that the scale of tactical nuclear explosion has occurred in Japan as data from a plurality of satellites. I think it is true enough to report to the people of the members so.”

Rice did not give up.

“There is no need to collect the other members of the syndicate to report only the facts.”

Assert once and for all, he went further.

“You wanted to explain it until now also directly to the members. That you meet the other syndicate members directly, it means that other members know someone. Are you saying it would have to mean that you know you were greeted by a member?”

He was silent for a moment waiting for the answer of Rice.

Rice did not say anything.

He continued again.

“I say clearly. There is no such qualification to you. Do you think that the qualification was given at the time you became Secretary of Defense?”

He continued after a pause, as if sneering Rice.

“Give a thought as well. Secretary of Defense will be able to change at any time. You became Secretary of Defense we chose you.

It is not your ability.”

Rice said intolerantly.

“I was appointed as the Secretary of Defense to the President of the United States”

“Your idea is naive. Indeed appointed by the president, but we were recommended to the Secretary of Defense to you. He was inaugurated as President of the United States, the force of our very large. So, the President is not our intention to ignore. If you have even a little doubt that fact, then we will appoint another person to the Secretary of Defense to dismiss you immediately.”

Rice was silent.

Our syndicate has a profound influence in this country and around the world. The likes of you, you want to be a member of the syndicate, the same as the dog will want to consider flying. You

faithfully follow my instructions in the future without thinking unnecessary things. I tell you to be on the safe side, it's just unusual that you are aware of the existence of the syndicate. If it leaks to the outside of the syndicate even a little from you, or you have disobeyed our instructions, you are missing any number of your life. Be sure to find out where you can even escape, we will give you a punishment."

Rice cringe to intimidation.

"While going back to, put two or three people to an appropriate person from the tight-lipped military person to the researchers. Researchers to be able to research thoroughly, you will assist. You will research different teams for you own. You should give special privileges to our researchers separate from the team. I want you to send me all the information of your team. However, the information to be passed to you our researcher decides to give since I choose to examine. Did you understand?"

"I understand"

When the Rice is still speaking, opponent hung up the phone.

While holding the mobile phone, Rice sighed deeply.

Far East department headquarters CIA U.S.

"I was surprised. Defense Secretary was asked to direct the Secretary of the CIA in the small things like this."

CIA officer one person said.

"The military did allow me wonder."

Different person said.

"Yes. Military always say, that it is arrogation and illegal intervention. "

"It seems urgently. Whether there is someone in Japan right people"

"There is the right person to the U.S. Embassy in Japan"

"Do people who work at the embassy? There any problem that people face is known? "

"It's no problem. That person is a third-generation Korean named Kim. It is not a problem because only in this research mission. The guy working at the embassy, but do not know his true identity. We do not know more about the guy that well. Person has not seen his true face. We can be made to work the dark side, continue to use it."

"Do not you use the Japanese?"

"No. Japanese get regular information only. However, the guy has a wide network to Chinese from Korea. Guy is good information of the dark side. The guy has got the information from North Korea."

"Guy is leak information of the United States give-and-take style."

"I don't know. But the guy is excellent."

"OK. We will choose him. I have spoken to the manager."

"I'll keep making the written directive."

Kim Japan

In a hotel room in Tokyo, Kim had been receiving encrypted e-mail the instructions on from the home country of the United States while operating the mobile computer.

Kim has completed a check of the mail in a single small room, as usual check in alone.

Kim was turn off the computer. And Kim has put a PC in a pocket of black leather long coat that hung on the wall.

There was nothing else luggage.

Kim was dressed in all black are unified. It was also black hat that hung on the hat rack, located at the entrance to the room.

On top of the desk, black sunglasses and leather black mask was placed. Kim was never to remove it in front of subordinates.

Kim sat down in a chair, relaxed put on top of the desk legs. Desk was attached to the wall to make (It surveys a massive explosion. Such a thing is left to the discretion of the authorities of Japan. Why do I have to survey?)

Kim had remembered the contents of the mail.

(There has been written with more energy than nuclear levels in the mail. Maybe, there is a possibility that the big money goes to me. I will send my minions to find out about it.)

Kim has taken out a mobile phone to contact people. Kim has detailed instructions to the person answers the phone.

Kim was clearly speaking in fluent Japanese slowly at low muffled voice. Mask was attached to the face of Kim.

Kim stood up finishing instructions. Fix black leather gloves that are not removed from the time of check-in, Kim put on sunglasses. Kim wore a coat.

Kim has confirmed that there are no traces of themselves in the room.

Kim left the room wearing a hat.
